Creative and detail-oriented Web Developer with expertise in building responsive, user-focused applications using React. Proficient in JavaScript, TypeScript, and modern development tools, with a strong ability to deliver high-quality, scalable solutions. Currently upskilling in mobile development with React Native to expand my capabilities in cross-platform app creation. Seeking a challenging role in the tech industry to leverage my front-end development skills, growing mobile expertise, and passion for collaborative problem-solving.

Professional Experience

Freelance Developer

Self-Employed   **Current**

- Designed and deployed custom web solutions using React, focusing on responsive design and client-specific needs.
- Managed end-to-end project lifecycles, from gathering requirements to deployment, enhancing client satisfaction by 100%.
- Began upskilling in React Native to explore mobile app development, completing initial personal projects.

Front-End Developer

Nasarawa state university Keffi , Nigeria   https://nsuk.edu.ng/   **January 2023 - 2024**

- Joined a team of 5 to develop a Web App with java-script to create a delightful user experience for over 35000 students.
- Created reusable React components for web applications, improving development efficiency by 25%.
- Integrated third-party APIs (e.g., Google Maps, payment gateways) into React Native apps, increasing feature adoption by 30%.

                                                                June-December 2022

Junior Front-End Developer

MicroScale Abuja , Nigeria   https://microscale.net/

- Supported the migration of legacy codebases to React, modernizing user interfaces and reducing technical debt.
- Worked with QA teams to troubleshoot and resolve bugs, ensuring smooth deployments.

Technical Projects

Micro scale Embedded https://microscale.net/
- Micro scale Embedded ltd *RC N0. 704773.*
- Designed and developed Micro scale Embedded ltd website from inception to implementation. Leveraged JavaScript HTML/CSS to create a responsive and user-friendly interface.
- Ensured security through an SSL certificate and restrict admin access to certain IPs.
- Implemented strategic design enhancements and user experience improvements, resulting in a 90% increase in sales within 136 days.

MoonLight– Mobile App (In Progress)
- Building a cross-platform mobile app with React Native as part of upskilling efforts for personal productivity.
- Implementing core features like offline storage and push notifications using Convex.
- Tech Stack: React Native, Clerk, JavaScript, Convex

Education
                                Self-Taught Developer

BSC in Computer Science

Alqalam University Kastina
2017-2022

- Completed online courses in React, Rust ,JavaScript, and React Native.
- Built a portfolio of projects showcasing practical application of web and mobile development skills.
